LAWN CARE PROGRAM

Round 1 Early Spring	Promotes early spring greening and recovery from the stress of winter. Crabgrass pre-emergents are applied for the control of annual grassy weeds.
Round 2 Spring	Provides just the right amount of fertilizer to keep your lawn green and healthy throughout the spring but not so much growth. Season-long crabgrass control as well as early season broadleaf weed control is provided.
Round 3 Early Summer	Sustains the green color of your lawn and helps it hold up against the stresses of summer. Broadleaf weed control to clean up broadleaf weeds that come up between our visits is included.
Round 4 Summer	Maintains your lawn's fertility level under the harshest summer conditions. Broadleaf weed control to clean up broadleaf weeds that come up between our visits is included.
Round 5 Fall	Enhances the natural thickening process that occurs in the fall as well as controls broadleaf weeds that come up between our visits is included.
Round 6 Winterizer	Keeps your lawn greener later in the fall and makes it come out greener earlier in spring. Protects your lawn through winter and develops a stronger root system so your lawn will look better with less watering next summer.

Your program will begin with round 3.

Field Service Professional: ERIC BROWN

Dear Homeowner:

For the convenience of our customers, Your lawn care service is automatically renewed from season to season, unless we are otherwise notified. To discontinue service at anytime, simply write or call us at our office. Remember, service call are free for all customers on the full program. We look forward to serving you. We urge you to call us if you ever have any questions.

COMMENTS 15,000 SQFT

THERE IS A 10' STRIP ALONG WATKINS ON SOUTH SIDE ENTRANCE BUT IT DOES NOT GET TREATED BECAUSE HOMEOWNER ON CORNER DOESNT WANT IT.
